

CE Machinery Directive 2006/42/EC

Date : 2023/07/03

To our customers:

The product application scope according to the existing EU Machinery Directive 2006/42/EC includes the following seven categories, with detailed definitions provided for each type of product in the directive.

- Machinery
- Safety components
- Chains, ropes and webbing
- Partly completed machinery
- Interchangeable equipment
- Lifting accessories
- Removable mechanical transmission devices

The screw-in cartridge valves and accessories produced by Winner are hydraulic components and do not have a complete function of their own. These hydraulic components must be installed in the customer's product to have complete functions, are not the requirements of the product scope in the Machinery Directive. Therefore, hydraulic components such as screw-in valves and accessories do not need to be affixed with the CE mark.

According to European Machinery Directive, a partly completed machinery should provide a "Declaration of Incorporation" and a partly completed machinery cannot be placed on the market until it is incorporated into a complete machinery and declared to comply with the provisions of the Machinery Directive.

Regarding the CE mark, some products produced by Winner are related to the following EU directives, please refer to the catalog or contact the sales department for the relevant product models.

- Pressure Equipment Directive 2014/68/EU (PED)
- Low Voltage Directive 2014/35/EU (LVD)
- Electromagnetic Compatibility 2014/30/EU (EMC)

Henry Sung
